

Iv. Javakhishvili Tbilisi State University, Georgia, decided to apply for the TEMPUS IV Call for Proposals for Joint Programs. The aim of our Joint program is to design a BA programme in Education Sciences , as well as develop the existing curricula in Education Sciences and Teacher education for MA programmes.

Currently there are the following MA and PhD programmes at the department of Education, TSU:

- MA programme in Education Sciences with three modules:
  1. Educational Leadership and Management
  2. Educational Politics
  3. Foundations of Pedagogical Sciences
- MA programme in Teacher Education with 15 modules (Each module corresponding to the subject )
- PhD programme in Education Sciences

As practice has proved, in order to raise the quality of education at the MA level, it is essential to attract students with the BA degree in corresponding specialties, thus enhancing the three-cycle educational process in accordance with Bologna Process.

Within the TEMPUS framework we would like:

1. To set up a new BA programme in Education Sciences with the following modules:
  - Educational Administration
  - Adult Education
  - Management of Information and Library Studies
2. To modernize and develop the existing curricula at the MA level.

We would appreciate the participation of your University as our partner very much. In case of your consent , we can talk about the detailed plan for future collaboration.

Sincerely yours,

Prof. Ketevan Chkuaseli,  
Head of the Department of Education,  
Tbilisi State University
